universal LNB, WF100 foam cables, Vision crimp  
type F plugs, Thunderbolt fixings and professional  
installation.

New customer promotion

**FROM**

**£80.00 all inclusive**

**Offers expire on 3rd May 2012**

**With HD pack get £50 off your 2nd bill**

Sky 44cm minidish, quad universal LNB, WF100  
foam cables, Vision crimp type F plugs,  
Thunderbolt fixings and professional installation.

**The HD pack is not mandatory  
but a higher installation cost  
may apply if you choose not to  
take it.**

## Installation matters!

When you book directly with Sky for an  
installation, you have no say in the equipment and  
materials that are used to complete the work. In  
general, you can expect to receive the lowest cost

versions of everything, with many customers  
getting a refurbished receiver rather than brand  
new. It is also common for Sky direct  
subcontractors to install the cheapest receivers  
rather than something of better quality. For Sky+  
and Sky HD, rather than use a second run of the  
correct cable, they will fit a reduced diameter twin  
cable with non standard connectors. The loss in this  
cable is therefore greater than with the correctly  
specified WF100 or equivalent and the correct  
connectors.

**So why use AJL Electronics?**

- AJL have a professional interest in making sure  
that your installation is done to the best standards  
rather than the cheapest. We only use the best  
materials and receivers that are currently on the  
market. HD receivers are installed to the same  
standard and are made by Samsung or Pace if  
available, otherwise we fit the new Amstrad  
500Gb.
- Each installation is carried out with care and  
expertise, with no nonsense about cable lengths,  
heights or chimney / flat roof mounted dishes.

## Price list:

**Labour charge** £75.00

(Up to 1.5 hours on site)  
Additional hour or part charged at £35.00

### Dishes:
